

FUNDING FOR INVESTIGATOR LEAD SATELLITE MEETING

The executive of APSH will make available up to \$5000US to assist individuals, groups or societies to hold a satellite meeting at the time of the APSH meeting in Singapore October 6-8 2017. (www.apch2017.org) A similar opportunity will exist at the time of the meeting in Brisbane in November 2019.

In general this will be a meeting for between 20 and 40 individuals and will be held at the same location as the APSH meeting and usually immediately prior to the meeting commencing. The meeting will usually be a full day meeting but exceptions can apply. At least 70 % of participants at the satellite meeting will be expected to enroll for the APSH Congress. If funds are used to help with speaker expenses they will be expected to be available to speak at the APSH Congress. The local organizing committee will provide space and projection facilities at no charge.

Applications are invited from individuals or societies related to the meeting in Singapore and need to be received by March 1. An indication should be provided how the money will be spent. The executive will make a decision whether to support the proposal and the amount of support by March 31 in time to allow early bird registration for the APSH congress.

If you require more information please contact the Secretary General at treforum@unimelb.edu.au
